Art Unit: 1724

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-9 are again rejected under 35 U.S.C. 102(b) as being clearly anticipated by Scholer.

Applicant's arguments filed September 13, 2002 have been noted and carefully considered but are not deemed to be persuasive of patentability. Applicant argues that "there is no teaching, or even suggestion, in Scholer of a restriction in the flow path of the solution of alkali metal ions and chloride ions situated between the outlet of the reservoir of a solution of alkali metal ions and chloride ions and the outlet of the chamber for holding an ion exchange cartridge." It is pointed out, however, that spring-loaded valve 49 of the reference device (best seen in Fig. 14) functions as a check valve (see col. 6, lines 58-59) to permit only downward flow of regenerant brine (see col. 4, lines 19-22) from reservoir 22 to chamber 16 containing the ion exchange cartridge. Accordingly, this spring-loaded check valve 49 is deemed to be structurally and patentably indistinguishable from the recited "restriction" of claims 4-9.

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
